Golf Courses EV Charging Solutions

From golf courses and tennis courts to swimming pools and fitness centers, country clubs often provide a wide range of exciting activities to keep members and their guests active and engaged. As the world continues to prioritize clean and sustainable energy options, parking lots at these locations will soon be filled with electric vehicles, and country clubs need to be ready for the impending transition. With members often spending hours on the premises during each visit, it's time for country clubs and golf courses to embrace the EV revolution and invest in the next generation of infrastructure with EV charging stations.

SOLUTIONS

We want to help you provide a simple turnkey solution that drives differentiation and revenue for our partners that want to be involved in the EV revolution.

- Appeal to savvy, conscientious and high net worth individuals through sustainability initiatives
- Provide a turnkey solution for members' requests for EV charging while at the club
- Provide as a complimentary benefit, a membership add-on, or through a revenue-generating amenity
- Add to existing sustainability efforts and to the overall perception of environmental concerns to members and the community
- The availability of charging stations communicates that your facility is on the leading edge of technology
- Demonstrate leadership in adopting green technologies
- Help improve air quality and reduction of CO₂ emissions in your community

STAND OUT FROM COMPETITORS

While approximately 80% of EV charging takes place at home or work, drivers are still likely to utilize public charging stations when available, particularly when a longer dwell time is expected. The average round of 18 holes of golf takes more than four hours to complete, providing ample time for drivers to charge their electric vehicles while playing. Country clubs and golf courses that host EV charging stations can boost revenue with a fee for charging or increase renewals and new memberships by including charging in the amenities offerings for no additional cost.
