

RESTAURANTS & EV CHARGERS

THE PERFECT PAIR FOR CUSTOMER CONVENIENCE AND BUSINESS GROWTH

DEMAND

By 2030, the U.S. expects 33 million EVs on the roads, with sales soaring from 3.4% to 29.5% since 2021. This surge signals a golden chance for restaurants to grow business and boost customer service by adding EV charging stations.

INCREASED VISIBILITY & TRAFFIC VIA EV APPS

Adding an EV charger places your restaurant on EV apps, bringing in diners at no advertising cost. It's an ROI win: travelers and locals seeking chargers will be directed your way, turning your location into a chosen stop on their journey.

CUSTOMER LOYALTY & RETENTION

Offer the ultimate convenience: EV charging at your venue turns wait times into dining opportunities, building customer loyalty. Simplify their experience further with QR menu access right at the charger for effortless ordering.

NEW REVENUE STREAMS

Boost your revenue and edge out competition — This is a service that pays off even when your doors are closed. Control pricing with flexible rates, securing a steady income day and night.
