

Is my EV compatible with Terra?

In North America, all-electric vehicles use the J1772 plug for Level 2 charging, except Tesla, which has its own plug. Fortunately, there is an adapter available that converts Tesla's proprietary plug to J1772. The J1772 has been adopted by the Society of Automotive Engineers as the standard plug for Level 2 AC charging. Here's a short list of some models that you've probably seen on the road!

J1772

Tesla

Audi e-tron

Volkswagen ID.4

Hyundai Ioniq Electric

Chevy Bolt

Tesla Model S

Porsche Taycan

Ford Mustang Mach-E

Hyundai Kona

Nissan Leaf

Tesla Model 3

BMW i3

Fiat 500e

Kia Soul EV

Polstar 2

Tesla Model X

Jaguar I-Pace

Honda Clarity

Kia Niro EV

Lucid Air

Tesla Model Y
